INTEGRATES WITH EXISTING SYSTEMS & WORKFLOWS

DALET

DALET Galaxy

Dalet Galaxy is an enterprise Media Asset Management platform which unifies the content chain by managing assets, metadata, workflows and processes across multiple and diverse production and distribution systems. Specially tailored for media workflows, this unique technology platform helps broadcasters and media professionals to **increase productivity** while providing operational and business visibility.

Dalet Galaxy is the common and unique platform to address all Dalet business solutions for **News, Sports, Program-preparation, Radio,** long-form **Production** and **Archives.** A central, unified multimedia Content Catalog manages media, essence files and metadata across the organization making assets available and enabling collaboration across the entire enterprise.

Workflow specific, task-oriented tools facilitate every aspect of content creation, management and distribution: Tools to design, manage and share media and metadata; tools to orchestrate the workflow, automate processes and human tasks; integration tools to unify disparate components into a cohesive system; business tools for more visibility across systems.

The Dalet Galaxy media asset management platform forms a robust core to enable all types of media workflow.

MediaLIFE

The comprehensive **Dalet Media Life solution** is tailored specifically for program preparation, production and multimedia archives. Simple tools let users quickly search the central repository and archives; access and share content which they can then log, index, edit rough-cuts, and create storyboards from anywhere in just a few clicks. Onboard task-list enables users to execute tasks quickly and efficiently, providing the right tools in the right context, be it for editorial purposes, such as the selection of content for distribution on a given outlet, or technical, such as manual quality control.

NewsSUITE

Dalet News Suite is an advanced, end-to-end production and automation system for today's multichannel newsrooms. It gives journalists intuitive tools for creating compelling multimedia stories and news packages right on their desktops. The Dalet Galaxy platform provides a powerful production workflow, facilitating field and newsroom collaboration that streamlines every aspect of news production and delivery.

SportsFACTORY

Dalet Sports Factory is flexible solution for the management, production, and distribution of sports content enabling users to improve workflows and processes so they can create, monetize, and distribute content easier and faster. The Dalet Galaxy platform adds significant value to the production chain, going well beyond a simple file-based workflow to provide a collaborative production environment where high-speed assembly and distribution are possible, even while recording.

RadioSUITE

Dalet Radio Suite is a production, playout and distribution system designed for radio operators who want to seize the opportunities of media convergence. Dalet Radio Suite streamlines every aspect of the digital production chain for news and music channels both for traditional over-the-air broadcasts as well as streaming, Podcasts, and other platforms. Programs and associated data are seamlessly managed while intuitve tools, enable journalists to create great stories and build and manage rundowns and DJ's to exercise their creativity with easy-to-use playlists, multi-track editing, and Carts for jingles and liners.

Unifying the Enterprise

A unique central **content catalog** stores all multimedia content across all workflows. Customized, contextual metadata forms for cataloguing and indexation with glossaries and thesauri ensure that content is quick and easier to find. All assets, including archived items, are immediately available for fast production and multiplatform distribution.

Enabling Global Creativity

Dalet Galaxy enables users to focus on being creative by providing a wide range of **back-office services** such as transcoding, QC, and metadata exchange across systems. Intelligent tools expertly manage data exchange facilitating better collaboration between individuals, teams, departments and multiple sites.

Providing Business Visibility

The Dalet Galaxy industry-standard, **BPMN 2.0 compliant workflow engine** orchestrates media workflows across the enterprise, providing greater visibility and efficiency. An easy-to-use modelling tool lets users graphically chart workflows; helping define roles, responsibilities and processes while embedded reporting tools provide a clear view of operational and business performance metrics.

Integrating the Ecosystem

Built on open standards with **SOA-compliant Web Services APIs** and standard data exchange protocols, Dalet Galaxy integrates multiple, complex systems into a unified entity that produces streamlined workflows and increased productivity.

Simplifying Administration

The Dalet Galaxy platform has been designed for **system security and high availability** while tools such as Dalet Dashboard help to monitor and manage the performance of Dalet solutions and third-party systems across the entire workflow.

About Dalet

Dalet software-based solutions enable media organizations to create, manage, and distribute content faster and more efficiently, fully maximizing the value of media assets.
Dalet products are built on three distinct platforms that when combined, form versatile business solutions that power end-to-end workflows for **news, sports, program preparation, production, archive and radio.** Individually, Dalet platforms and products offer targeted applications with key capabilities to address critical media workflow functions such as, ingest, QC, edit, transcode, and multiplatform distribution.

The foundation for Dalet productivity-enhancing workflow solutions, **Dalet Galaxy** is the enterprise MAM which unifies the content chain by managing assets, metadata, workflows and processes across multiple and diverse production and distribution systems. Specially tailored for media workflows, this unique technology platform helps broadcasters and media professionals increase productivity while providing operational and business visibility.
Dalet AmberFin is the high-quality, scalable transcoding platform with fully integrated ingest, mastering, QC and review functionality; enabling facilities to make great pictures in a scalable, reliable and interoperable way.
